

(h) Distinction of it being the object of a domestic standard

It is not the object of the present Japanese domestic standard.

(i) Restrictions information about use of a patent right

All the exclusive concessions about the patent belong to International Information Science Institute CO., Ltd, and any use concerned will under the permission or contract of International Information Science Institute CO., Ltd.

(j) Table of the reference data of all related algorithms

Japanese patent 7-334081 (applying)
U.S. patent 5,696,826

(k) Description about an algorithm

It opens to the public by patent description.

(l) Use mode

In this algorithm, it is available to use electronic codebook (ECB), cipher feedback (CFB), cipher block chaining (CBC), output feedback (OFB), addition stream encryption, and black-box mode. However, these modes do not need to be used on the principle of this algorithm.
